ASSMENBY AND
FINISHING INSTRUCTIONS

The X-Acto® House of Miniatures® Collectors Series of
furniture and accessories have all been carefully researched by
specialists through major
museum and library collections
to assure the highest quality of
authenticity in reproduction.
Details are extraordinarily
accurate to satisfy the most
discriminating miniaturist.

Every item in the line is an
authentic reproduction in mini-
ature of regular-size furniture
created by master craftsmen
during the Colonial period, preci-
sion scaled, one inch to one
foot.

All wood parts are machined to
assure accurate and precise ac-
cptance of each piece by
another.

The rooms illustrated have been
completed using standard
X-Acto® HOUSE OF MINI-
ATURES products. All individual
components are available.

For a complete catalog of the
X-Acto® HOUSE OF MINI-
ATURES furniture line and
accessories, write to:

X-Acto® THE HOUSE OF
MINIATURES Dept. KIT
45-35 Van Dam Street
Long Island City, New York
11101

Please include 50c for postage
and handling.
before starting

A. Identify and account for each part by placing it on the LAYOUT SHEET (Page 2). This will indicate, at a glance, whether any parts are missing. (See instructions at bottom of last sheet to order missing parts.)

B. The LAYOUT SHEET contains a molding configuration list. Use this to identify the different molding that comes with the kit.

sanding

NOTE: When using sandpaper, remember that the higher the grit number, the finer the finish.

A. One sanding method that has proved successful is the use of a sanding platform. Tape a sheet of sandpaper of the proper grit size to a hard flat surface such as a table top or wood block. Press down lightly and move the piece to be sanded in the same direction as the wood grain until the surface is smooth. Take care not to round any edges or corners of the pieces.

A. Glue should be applied in small amounts to both surfaces being joined. On end cuts, it may be necessary to apply a second coat of glue before joining the parts.

B. To ensure a tight fit, squeeze excess glue out of the joints by holding glued parts together with either clamps, rubber bands or by placing weights on the parts.

C. Wipe off excess glue promptly with a damp cloth.

D. Be sure a glued assembly has dried thoroughly before adding any more parts.

tools and materials

A. The following tools will be helpful in constructing this kit:
   1. Knife, X-ACTO No. 1, with Blade, X-ACTO No. 11
   2. Tweezer, X-ACTO No. 36
   3. Two-inch Sander, X-ACTO No. 42
   4. Large Clamp, X-ACTO No. 4004
   5. Small Clamp, X-ACTO No. 4003
   6. Power Sprayer, X-ACTO No. 43661
   7. Mitre Box, X-ACTO No. 533
   8. Razor Saw Set, X-ACTO No. 4056C

B. The following materials will be needed to construct this kit:
   1. Straight pins or artist’s push pins
   2. Rubber bands
   3. Waxed paper
   4. Sandpaper - 220
   5. Ruler
   6. Paint of your choice
   7. White glue, or any good wood glue
   8. Small artist’s brush

Inside molding dimensions are given from furthest point to furthest point and shall be cut at 45° angles unless otherwise noted.

Outside molding dimensions are given from inside point to inside point and shall be cut at 45° angles unless otherwise noted.

Mitre Cut: To match two pieces of molding together by cutting the two pieces at a specified angle.

Straight Cut: To match two pieces together without the use of a mitered cut.
A. Before starting to assemble your kit, study all illustrations and instructions carefully. Be certain you understand each step before proceeding to the next one.

B. Follow the sequence of steps in the order they are presented. Do not skip steps or take any shortcuts.

C. Refer to ALIGNMENT (page 5) for patterns to be used to align the frame for gluing. When gluing parts together, use a flat toothpick or similar tool to apply a small amount of glue to the parts to be joined. Remove any excess glue promptly with a damp cloth. Remember to let each glued assembly dry thoroughly before adding the next part.

D. Begin assembly of the frame (see DETAIL A, page 3) as follows:

**NOTE:** Before gluing ensure smoothest surfaces face outward to enhance the beauty of your finished piece.

1. Glue top cross member (part no. 79) to two sides (part no. 78).

2. Align parts face down on alignment pattern no. 1 (see ALIGNMENT, page 5).

3. Hold, pin, or clamp parts in place until glue sets. (Follow instructions for glue being used for the proper setting time.)

E. Continue assembly of the frame (see DETAIL B, page 3) as follows:

**NOTE:** Structure should still be in the face down position. Before gluing, small pencil marks on the back at the predetermined dimensions will aid in assembly of this part.

1. Glue lower cross member (part no. 96) to assembled DETAIL A, 3 1/2 inches from top cross member (part no. 79).

2. Use clamps to hold parts in place until glue sets.

F. Assemble rear frame supports (see DETAIL C, page 3) as follows:

1. Glue lower rear frame support (part no. 82) to back of assembled DETAIL B, 3 3/8 inches from the bottom and ensure equal distances on either side.

2. Glue upper rear frame support (part no. 82) to back of assembled DETAIL B, 3/4 inch from top and ensure equal distances on either side.

3. Use clamps to hold parts in place until glue sets.

G. Assemble recessed center section (see DETAIL D, page 3) as follows:

**NOTE:** Structure should still be in the face down position. Before gluing, small pencil marks on the back at the predetermined dimensions will aid in assembly of this part.

1. Glue recessed center section (part no. 95) to assembled DETAIL C, 1 1/4 inch from either side with top butted directly against upper rear frame support (part no. 82) for squariness.

2. Hold part in place until glue sets.

H. Assemble frame sides (see DETAIL E, page 3) as follows:

1. Glue two frame sides (parts no. 76) to assembled DETAIL D.

**NOTE:** The four sides supports (parts no. 83) shall be positioned in the approximate areas shown. The side supports add strength and rigidity to the frame sides.

2. Glue four side supports (parts no. 83) to frame sides (parts no. 76) and assembled DETAIL D.

I. Assemble the hearth (see DETAIL F, page 3) as follows:

**NOTE:** When installing hearth (part no. 86) ensure notched portion is aligned with rear edge of assembled DETAIL E.

1. Glue hearth (part no. 86) to assembled DETAIL E.

2. Stand assembly in an upright position and allow glue to set.

J. Begin assembly of the front frame (see DETAIL G, page 3) as follows:

1. Glue two sides (parts no. 90) to tip (part no. 89).

2. Align parts face down on alignment pattern no. 2 (see ALIGNMENT, page 51).

3. Pin to hold parts in place until glue sets.

K. Assemble the front frame (see DETAIL H, page 3) as follows:

**NOTE:** Structure should be face up. Before gluing, small pencil marks on the extreme lower part of the structure at the predetermined dimensions will aid in assembly of this part.

1. Position assembled DETAIL G on front of assembled DETAIL F maintaining a 3/8 inch dimension on either side and flush with bottom.

2. Hold part in place until glue sets.

L. Assemble moldings (see DETAIL I, page 3) as follows:

**NOTE:** Use the Mitre Box, X-ACTO No. 533 and the Razor Saw Set, X-ACTO No. 4055C to obtain a straight clean cut. Also, use the Molding Configuration List (see INTRODUCTION, page 1) to identify the molding number with the actual molding configuration.
1. Straight cut two lengths 4-1/4 inches long from molding (part no. 94).
2. Glue two moldings (part no. 94) to assembled DETAIL H.

M. Begin assembly of the mantle (see DETAIL J, page 3) as follows:
1. Glue mantle support (part no. 84) to mantle (part no. 85).
2. Align parts on alignment pattern no. 3 (see ALIGNMENT, page 5).
3. Use clamps to hold parts in place until glue sets.

N. Assemble the mantle (see DETAIL K, page 3) as follows:

NOTE: Ensure assembled DETAIL J is centered on front frame,
1. Glue assembled DETAIL J to assembled DETAIL I.
2. Hold parts in place until glue sets.

O. Begin assembly of the fire box (see DETAIL L, page 3) as follows:

NOTE: The fire box sides (part no. 88) and fire box back (part no. 87) have been designed with chamfered edges. This ensures the proper angle is obtained after gluing.
1. Glue fire box sides (part no. 88) to fire box back (part no. 87).
2. Align parts on alignment pattern no. 4 (see ALIGNMENT, page 6).
3. Hold parts in place until glue sets.

P. Assemble fire box (see DETAIL M, page 3) as follows:

NOTE: Ensure fire box is centered in opening and chamfered edge of fire box touches fireplace frame.
1. Glue assembled DETAIL L to assembled DETAIL K.
2. Hold in place until glue sets.

Q. Assembled recessed center section molding (see DETAIL N, page 3) as follows:

NOTE: Inside molding (see INTRODUCTION, page 1).
1. Miter cut two pieces molding (part no. 91) 3-1/2 inches long and two pieces 3 inches long.
2. Glue to recessed center section (assembled DETAIL M).
3. Hold in place until glue sets.

R. Assemble mantle molding (see DETAIL O, page 3) as follows:

NOTE: Outside molding. (See INTRODUCTION, page 1).
1. Miter cut two pieces molding (part no. 92) 1/2 inch long straight cut one side.
2. Miter cut one piece molding (part no. 92) 6 inches.
3. Glue to mantle (assembled DETAIL N).
4. Hold in place until glue sets.

S. Assemble hearth molding (see DETAIL P, page 3) as follows:

NOTE: Outside molding. (See INTRODUCTION, page 1).
1. Miter cut two pieces molding (part no. 93) 29/32 inch long straight cut one side.
2. Miter cut one piece molding (part no. 93) 5-27/32 inches.
3. Glue to hearth (assembled DETAIL O).
4. Hold in place until glue sets.

T. Assemble firebox molding (see DETAIL Q, page 3) as follows:

NOTE: Inside molding. (See INTRODUCTION, page 1).
1. Miter cut two pieces molding (part no. 93) 3 inches long, straight cut one side.
2. Miter cut one piece molding (part no. 93) 3 inches long.
3. Glue to chamfered edge of fire box (assembled DETAIL P).

U. Assemble front frame molding (see DETAIL R, page 3) as follows:

NOTE: Inside Molding. (See INTRODUCTION, page 1).
1. Miter cut two pieces molding (part no. 92) 3-1/2 inches long, straight cut one side.
2. Miter cut one piece molding (part no. 92) 4-1/16 inches long.
3. Glue to front frame (assembled DETAIL Q).
4. Hold in place until glue sets.

V. You have now completed assembly of your fireplace. The completed piece should look like that shown in DETAIL S. Lightly sand all joint areas to remove excess glue using 220 grit sandpaper. Moisten a cloth slightly and rub the surface to remove all particles of wood. When all signs of moisture have gone from the wood, paint with a high quality paint of your choice.
A. Tape this sheet to a smooth, flat surface. Then tape a sheet of waxed paper to the pattern so that any excess glue at the joint will not stick to the pattern, making it difficult to remove the completed assembly.

B. Use the alignment patterns shown here to position the indicated parts properly and to hold them in alignment while drying. The arrowheads show the points to insert the straight pins to properly secure the parts.
